**OCCUPATIONAL HEALTH
AND SAFETY MANAGEMENT**

PREMISE

Ignorance of safety regulations has led to many undesirable and events or sudden mishaps which interrupt activities or function in many organizations. In some cases it has resulted in huge loss and death. To prevent these hazards, there is the need to understand the basic principles of accident prevention and industrial safety regulations while the designing and implementation of adequate safety programmes in various organizations is a necessity. In view of this, the need for a workshop where staff in private and public organizations can be imbued with the required skills for safety and accident preventive measures cannot be overemphasized. This training program would examine the need for organizations to be concerned with the safety of their workers; it would also the skills in ensuring basic and fundamental health and safety management in their organization.

SPECIFIC OBJECTIVES

At the end of the workshop, participants would be able to:

- Observe and use the basic precautionary measures in accident prevention and safety
